Serango Baptist Rural Hospital Power & Water Project (May 2023)

Tree of Life International Private Ltd.
In partnership with New Life Ministries

Project Survey: In conjunction with hospital staff, local community and Tree of Life staff completed a project survey of Serango Baptist Rural Hospital primary needs. It was determined primary needs were as follows:

(1) Repair of generator & converting generator to auto-start
(2) Provide 3 water purifiers (doctor quarters, nurse quarters, hospital)
(3) Repair water line from outside well to water tank inside hospital compound (1500 meters distance)

Project Proposal: Submitted for New Life Ministries to Donor by Tree of Life.

The Serango Baptist Hospital was built by Canadian Baptists for the Kui/Surao Baptist Convention, but Canadian Baptists have not sent support for the last 25 years resulting in the hospital's neglect, deterioration and closure. Over the past two years two local doctors and some nurses have re-opened the hospital. The hospital serves a region with over 100,000 people in 60 surrounding villages representing seven different tribal groups. The nearest city is 45 km from this rural region. This project will repair the hospital's generator, provide water purifiers to deliver clean water for staff and patients, and repair a nearby deep well along with piping needed to bring water to the hospital.

Project Breakdown:

Completed

1500 meters of pipeline connecting well with hospital water tank
3 Water Purifiers
New coil for Generator & Auto-starter with panel board

Additional Benefits not in project but completed within budget

2 invertor batteries + Invertor Panel
1 HP water pump

Respected sir,

Greetings to you in the name of our Lord and Savior Jesus Christ. It is my privilege to be writing this Project completion letter to you at this time. We at Serango Christian Hospital are deeply grateful to you and your team for the approval and execution of the project of establishing a Running Water line, Drinking water supply and continuous power supply through a Generator. Back in July 2022, we had the opportunity to frame a project for running water supply in our hospital. Water being one of the basic necessities for human life, though available in our area, has become a major burden to us as we were relying on open wells for the past few years. Without running water supply, the hospital functioning was affected.

We requested for a total of 1040 mts long running pipe line, the repair of the existing motor pump, the water tank repair, 4 Water purifiers and a battery for the generator. As part of this project, I am happy to share with you that we have established 1140 mts of running pipe line, repaired the water tank and the motor pump, purchased and installed 4 water purifiers and a new battery for the generator. With the approved project grant, there was an additional amount of fund due to the conversion to Indian currency. With this fund, we have purchased and installed a 3kV Inverter for the General Wards of the hospital and also a 1 hp motor pump for running water in the doctors' quarters.

I am extremely grateful to you for your support. Through this project, we now have running water supply, drinking water and continuous power supply in the hospital. I pray that you will continue to support us and encourage us. I especially would like to thank Mr. Manoj Kumar for his perseverance in the execution of this project. He constantly guided and encouraged us throughout this work. I look forward to keeping in touch with you and God willing, meeting you in person. I praise God and thank Him for you, your organization and your ministry throughout the world.

Thanking you

Yours sincerely

Dr. T. Apollos John
